

History

When we came here in 1996 school already existed here, when Revatee raman prabhu became president he started looking after school. Later school was managed by temple brahmacharis. Later I was asked by authorities to see the school.

School is based on state government syllabus side by side we are teaching them from bhagavad gita and Ramayana and Mahabharata. Students and their parents are liking our school very much. We have 15 teachers and one HM. Sanskrit and Hindi is second language. We have total 120 students from LKG to 10th standard. Here we are giving admission to all kinds of children. We are not spending a single rupee on advertisement. Parents and children are doing advertisement. It was very difficult to get teachers because teachers don't want to go to spiritual organization. Outside schools are taking money but not giving anything to children or to the parents.

Success factor

We meet with various parents of our past students and they are very thankful to us for giving their kids the moral and values in life. These students are very successful today; they are officers in many multinational companies etc. teachers also have stopped watching cinemas, meat eating they have started chanting. In 10th standard cent percent students are getting passed. Even the dull students are getting good marks without copying.

Hierarchy

We have 15 teachers in that 4 are voluntary. We start classes with slokas, we discuss Krishna book, we highlight values from moral stories.

Resources

From past 4 years we are self-sustained before that temple used to help us. We are charging very less fees from students intention is that everyone should get good education. But some parents are mistaking thinking because they are not teaching well that why they are charging less. Sometimes we also get donations from devotees.
